LOCAL AND GENERAL

J. W. Fath celebrated his eightieth birthday on Sunday, all the members of his family living in Alberta being present as well as a number of friends. Mr. Fath was one of the earliest settlers in this district and hosts of friends will congratulate him on achieving four score years. In addition to his family of seven he has thirty-two grand children and six great grand children. In his long residence here Mr. Fath has won the esteem of everyone with whom he has come in contact and in expressing the wish that he may celebrate many more birthdays The Chronicle is only echoing the general sentiment of all who know him.

The annual meeting of the Champion Consolidated School District was held in the school house on Saturday. There was a fair attendance and considerable interest was taken in the proceedings. Five nominations were made for the position of school trustee, W. C. Hoskins being the retiring trustee. These were W. C. Hoskins, A. McCullough, H. E. Gill, G. L. Dupue and G. H. Mark. The voting indicated that Messrs. Hoskins and McCullough were tied for the honor and Mr. Hoskins retired in Mr. McCullough's favor, making the election unanimous. Peter Holm was selected to fill the country vacancy caused by S. Fath leaving the district, leaving the board consisting of F. Fleming, P. Holm and A. McCullough.

The value of Alberta's dairy production in 1928 is placed at \$20,350,000 according to figures recently compiled by the Department of Agriculture. The decrease from the 1927 total of \$20,750,000 is attributed to the splendid crop prospects during the summer of 1928, the high price of beef and the consequent reduction in the number of milk cows retained on many farms. The year's production includes 14,325,000 pounds of creamery butter from 100 creameries at an average price of 37c a pound, 724,500 pounds of cheese from 9 factories, valued at 22c per pound and miscellaneous products including milk and cream for direct consumption, home made butter and cheese, skimmed milk and buttermilk on which a valuation of \$14,890,360 was placed.

Mrs. W. McEae and Mrs. Fred Clever, assisted by Mrs. Geo. Campbell, held a shower at Mrs. Clever's home on Thursday evening last week in honor of Mrs. Wilfred Collison, nee Miss Olive Larkins. The bride was the recipient of many beautiful presents and a very pleasant evening was spent, a dainty lunch being one of the features.

Establishing a new mark in the history of the province, Alberta petroleum production in 1928 reached the imposing total of 480,318 barrels, according to figures published during the past week. This is an increase of 46.4 per cent. over the 1927 production of 328,133 barrels. Field established a high mark in the month of December with a production of 48,505 barrels. The increase over the 39,709 barrels recorded in November is made up largely by the output from the Okalta No. 1 Well. The total production in the province for 1928 was made up as follows: Turner Valley, crude naptha, 374,705 barrels; Turner Valley, crude oil, 104,004 barrels; Wainwright Field, crude oil, 6,919 barrels.

Local and General

Distemper or some similar disease is rampant among the dogs in town.

Mrs. B. D. Hummon, who has been seriously ill, is improving in the Lethbridge hospital.

Mr. and Mrs. J. M. Moffatt were guests of Mr. and Mrs. Duncanson at Lethbridge on Sunday.

J. Kulpas has sold his interest in the Ford garage to Mr. Atkins, who will carry on the business in future.

Mrs. J. Archibald, pianist, was omitted from the list of officers installed by the O. E. S., in last week's issue.

Mr. and Mrs. J. Pullen and daughter and Mrs. Haines of Lethbridge, spent the holidays with Mr. and Mrs. J. M. Roseluck.

The Elk's Christmas tree has been trimmed up and will now be utilized as a silent policeman directing traffic on the main corner.

Lethbridge interests are looking for building room for an auto repair shop, but up to date have not succeeded in acquiring anything satisfactory.

"Mountain Highway Still in Air" proclaims a heavy headline in the Albertan. How could a mountain highway be anywhere else than in the air?

A committee appointed by the Ladies' Aid will hold a "Guest Tea" Feb. 2nd at the home of Mrs. W. S. Ryan. Further details next week.

Among visitors over the week end were C. S. Thornton and H. Hough of the Canadian Bank of Commerce at Lethbridge, recalling themselves in many old time friends.

Messrs. Granlin and Running are busy equipping their service station in the building formerly occupied by Mrs. Theriault. Everything modern will be installed in this case.

Despite rather heavy ice at time games were played on schedule during the past week by the curlers, although there were many who had difficulty in getting the rocks "up."

Mr. and Mrs. A. Euckett wish to thank all those who came to their assistance in their recent illness and also the Champion Elks and the Women's Institute for floral offerings.

Mr. and Mrs. F. S. Racher wish to thank the Champion Elks, the Women's Institute and other friends who sent flowers and otherwise rendered kindness to Mrs. Racher during her stay in the General Hospital in Calgary.

Oscar Castator found the back of his new Marmon car scared all over with a jack knife or some other sharp instrument. The mind that conceived such a method of expressing spite must work overtime.

Edmonton, during this week will be the scene of a number of gatherings of importance to residents of rural sections of the province. It is expected that over 500 delegates and possibly as many visitors will attend the annual U. F. A. Convention to be held in the First Presbyterian Church. Many of the delegates and others interested in the production of good seed grain will also attend the Provincial Seed Fair and the annual meetings of the Alberta Seed Growers' Association which will be held during the same week in the Chisholm Block and the Hudson's Bay Building respectively.

NOTES AND COMMENT.

As was to have been expected the new year has opened quietly. The big rush of grain is over, although a considerable amount is delivered every day. The unusually mild winters has had a depressing effect on the sale of winter wearing apparel leaving the merchant with considerably more of this class of goods on hand than is desirable. Regular lines have moved fairly satisfactorily all through the fall and winter but this does not entirely make up for the overstocks of winter goods. Collections are reported as fair by most of the merchants.

The big programme of extension planned by the C. P. R. in Northern Alberta and Saskatchewan is to be opposed by the C. N. R. when the application for charters comes before the Dominion house. It is to be devoutly hoped that the railway building programme is not postponed indefinitely as a consequence. A big country would be opened up by the extensions outlined. Whether these are built by the C. P. R. or C. N. R. is not so interesting to the public as to have them built in the near future.

The Saskatchewan Royal Grain Commission is making progress, in spite of the fact that some of the charges made by witnesses will not stand investigation. On the whole, however, the evidence secured may result in changes which will prove beneficial to the farmers. Mixing of grain at terminals is the outstanding source of complaint.

The annual report of the Canadian Bank of Commerce is one of the most optimistic documents ever issued by a bank in Canada. The affairs of the bank are in an enviable position, with big increases in earnings and assets. Practically general prosperity is noted all over Canada, with a growth and expansion showing in every portion of the Dominion.

The marvellous weather still continues. There was a light snow flurry on Sunday and the weather was slightly colder but not sufficiently so to prevent everyone being around.

The campaign for good seed wheat is under way again as everyone begins to look forward to another crop. This year, in particular, there is so much damaged grain that the question of securing good seed looms larger than ever. Wherever it is at all possible avoid sowing wheat that has suffered any serious damage.

It is understood that the Marland oil interests will put a deep drilling outfit in the Champion district in the near future and go down in earnest for oil, after making a number of soil tests by shallow drilling. They are also operating in the

Who Is To Blame!

The U. F. A., the mouthpiece of the United Farmers of Alberta, is strongly urging government owned hydro-electric utilities in the province. While their urge to municipal bodies to avoid hooking up with private owned enterprises in this line might be construed as a criticism of the municipal bodies which have granted franchises to privately financed corporations, does it not apply with much greater force to the government of the day. Had the government intimated in any way that hydro-electric development was a part of their policy at any reasonable time in the future there would have been an alternative policy open to the municipal authorities. With nothing of the kind under consideration it is strange that the privately owned companies were dealt with. Even if these companies must be acquired later at an excessive cost as compared with their actual outlay would the U. F. A. expect the country to stand still in the way of introducing hydro-electric energy in the hope that as some distant time it might be introduced as a public owned utility?

Good Seed Essential For Good Crop

(Experimental Farms Note)

While admitting the importance of high fertility and good cultivation as essential for a good seed-bed, let us not forget the importance of sowing good sound seed, pure as to variety, free from weed seeds, of high vitality, and which has been treated for smut. The time never was more opportune or more ripe for the necessity of sowing pure seed than it is today.

With the ever-increasing weed problem, and the multiplicity of varieties that are on the market, the time is at hand when we must sow pure seed, if we expect to reap the highest returns from our farms.

Champion P. O. for Reservations and Terms.

The wideawake farmer does not wait until the last minute to prepare and clean his seed, and will always be found ready when seedling time arrives, to sow seed that has been cleaned, of good germination, and which has been treated for smut.

The practice of the Modern Experimental Station, in regard to seed grain, is to clean all grain intended for seed purposes shortly after freeze-up, and to forward two-pound samples to the Dominion Seed Branch, Winnipeg, for grading and germination test. The Seed Branch, Winnipeg, will test samples of grain from the past season's crop received before January 1, free of charge. Too few farmers avail themselves of this opportunity.

With the long winter days at hand, when the farmer has ample time to spare, why not crank the little gas engine, start the fanning mill going, get the seed grain ready, and be prepared for the big rush in the spring.

For those farmers who are intending purchasing seed grain, now is the best time to get busy. Don't delay, but secure your seed early, then you will have no worries about seed grain when spring opens up.

In a seed grain survey made in Manitoba, one farmer was sowing seed supposed to be Marquis, but up a analysis, only 60 per cent was Marquis, while the other 40 per cent consisted of weed seeds, and other varieties of grains.

We cannot hope to produce grain that will maintain our high standards on world markets, if more attention is not given to the seed we sow.

A Want Advt. will do it.

About Ourselves

Scanning the pages of a little farm machinery magazine the other day, the attention of the writer of this column was drawn to a short article headed "About Ourselves," and, like everybody else, being interested in himself, he proceeded to read it. It appeared to him as so human so absolutely true, so worth-while, that he decided to pass it on to the readers of this paper and thus give still wider circulation to a message which all would do well to heed. Here is the article:

"We all want the things that we think will make us happy. We want to own things, to know about things, to go places, to do things, to work out ideas, to live the esteem and respect and affection of folks.

The bigger our wants, the more chances we have of being worth while. The person who cares for nothing amounts to nothing. We begin wanting the things we are born. When we quit wanting, we'll be dead. If we don't want anything, we are hopeless.

If we don't think about our wants, we let little desires crowd out the really big, worth while desires. "I didn't think," is the excuse most often given for acting foolishly, recklessly, dangerously, selfishly. Unnecessary accidents and needless griefs follow. Thinking clears the way for restful action. If we don't think, we are reckless and selfish.

In order to make our feelings and thoughts count, we must do something. The more things we get good thoughts backed by strong feelings and doing nothing, the worse of we are. Doing things tests our thinking and our feeling—enables us to do clearer thinking and work out happier things the next time. If we want work, we are helpless.

A slight change in the way of living makes a great change in life: the right of a new idea may point the way to the successful working out of a problem; even when things seem wrong and we can't see clearly, starting to do something may clear the way.

What we feel, what we think, and what we do make us what we are."

The message, read it over again, then, once again, read the last lines: "What we feel, what we think, and what we do, we are."

Now read the first sentence again: "We all want the things that we think will make us happy."

This article is about ourselves. It is a sort of heart to heart talk, a kind of personal stock-taking at the beginning of a new year. So, let us ask ourselves some pointed questions.

Granted we want to be happy, were we ever happy while thinking mean, uncharitable thoughts about somebody else? Rather, have not our happier moods been those when kindly thoughts of others occupied our minds?

We will find happiness in the esteem, respect and affection of others. There are few of us but desire to be popular. But can we command these things, or do we deserve them. If, on our part, we are entertaining feelings of contempt and hatred for those around us?

We find joy in doing things, can we can expect to accomplish much if we are arrogant in our attitude towards others, if we insist upon always having our own way. If we are intolerant of the views and opinions and convictions of those with whom we are called upon to work?

A person who is always suspicious of others soon becomes the object of general suspicion. Thinking mean thoughts, cultivating uncharitable feelings, doing unwise things, may or may not hurt those against whom they are directed, but they most assuredly do hurt the one who indulges in them. They affect his or her whole character. Persisted in they will even leave their indelible mark upon the countenance with the result that the ugly inner life will be like an open book that all others may read—and shun.

The happiness so much desired is not to be found that way; rather it is the death of all happiness.

Remember: "What we feel, what we think, and what we do, we are."

Gave Service Graciously

Colorado Doctor Labored For 25 Years Making No Charge For Medical Attention

Dr. B. A. Arborgast, the "hermit physician" of the rough, mountainous country west of Craig, Colorado, died of poverty recently, after a career devoted solely to gratuitous service of his fellow men.

For 25 years Dr. Arborgast has been the physician in a rugged cattle country, which embraced 160 square miles surrounding the little cabin where he lived alone. He ministered to the ills and hurts of cowboys, homesteaders, cattlemen—and made no charge for his services.

Forty new school districts were established in Alberta in the nine months of 1928—making a grand total of about 2,500 in the province.

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

Progress In Aviation

Over 300 Airplanes Now Operating In Canada

On January 1, 1929, there were 335 aeroplanes in operation, or more than three times the total a year ago, according to a survey of Canada made by the bureau of statistics. There are at present 44 air bases in Canada, as compared with 23 last year. Licenses held by commercial pilots at the first of the year numbered 190, nearly five times the number on the comparative date. Activity in the north has been largely responsible for the rapid progress in aviation.

Hockey players use Minard's Liniment.

Stockings were invented in the eleventh century, but weren't discovered until the twentieth.

11 Stomach

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer when you learn how quickly, how pleasantly this premier method acts. Please let it show you now—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Help British Unemployed

Canadian Fund Opened By A Toronto Newspaper For Relief Of Miners

An indication of the interest which has been aroused in Canada of the plight of the British unemployed, particularly the miners and their families, is given by the response to a fund for their relief, opened by a Toronto newspaper. The fund, the first of its kind opened in Toronto has received the endorsement of Hon. D. D. Ross, Lieutenant-governor of the province, and leaders in every section of the industrial, political and religious life of the city.

INFLUENZA'S VICTIMS

Left Weak, Miserable and Praying To Disappear In Many Forms

One of the most treacherous diseases afflicting the people of Canada during the winter months is influenza. You can avoid influenza entirely by a complication of trouble. In its victims suffer with aching fevers and chills, headache, sore throat, and it leaves them an easy prey to bronchitis and pneumonia. It is a deadly enemy of the blood-building, nerve-restoring tonic which Dr. Williams' Pink Pills for Pale People.

Here is proof of the power of Dr. Williams' Pink Pills for Pale People. Mr. F. H. McMillen, Belleville, Ont., says: "Some years ago, following a severe attack of influenza, I was left in such a weak condition that I could not do my work. I developed nervous indigestion, and my blood got thin and watery. In this weak condition I began the use of Dr. Williams' Pink Pills for Pale People. The blood began to build and my health improved. I can honestly say I think them the best blood builder and nerve tonic I have ever used. I shall always praise them."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Unique Method Of Testing Farm Seeds

Virginia Department Of Agriculture Controls Temperature Of Artificial Spring

A method of simulating spring artificially in a modern version of the old family ice box was described at New York City by the director of Official Seed Analysts.

It is used for testing the germination of farm seeds at the Virginia Department of Agriculture, at Richmond, Richmond. By a specially prepared chamber and an artificial refrigerator, controlled by means of the use of reliable home remedies, are obtained over test seeds planted in special soil boxes.

Even the breezes of spring, so far as they are useful to the farmer, are preserved through the action of cold water running through the apparatus and providing the air purification that takes place in open fields.

Spring's sunshine is reproduced in effect through an electric fan. Its emanations being distributed from beneath a covering of water.

Our Home Medicine Chest. Among the standard household remedies that should always be on hand in your home medicine chest, none is more important than Dr. Thomas' Electric Oil. Its manifold usefulness in relieving pain and healing sickness is known by many thousands throughout the land. Always use Dr. Thomas' Electric Oil for rheumatism, neuralgia and sciatic pains, treating sore throats and chafes, coughs, burns, scalds, cuts, bruises and sprains.

Worth Finding Out

Dr. F. G. Banting is now experimenting with "royal jelly," the food which the bees feed to develop the queen bee. Some scientists think that this stuff, which is said to prolong the life of the queen bee for several years, may have some merit as a food for human beings. It is worth trying to find out just what it is composed of.

Greatest Swiss Avalanche

The greatest of Swiss avalanches occurred a century ago when five million tons of ice fell from the Alps glacier at a speed of three hundred miles an hour from a height of five thousand feet. Ice fragments were flung after hundred feet up the opposite mountain side.

Lawyer (noted for high fees)—I trust you profited by my advice. Client—"Yes, but not so much as you did."

For frostbite use Minard's Liniment.

Teacher—"Now, James, name America's greatest general." James (the son of a broker)—"General Motors."

Never Told These

Inquiring Guests Ad To Wonders

"The Equator," said the youngest waiter, his examinations, "is a menagerie lion running around the earth." Schoolboy howlers are all ways rich in humor. But the howlers are not always made by schoolboys.

Last summer a lady came up to the transportation desk in Jasper Park Lodge to inquire about the motor trip to Mount Edith Cavell and the Angel Glacier. She was very anxious to make nothing of the wonders of the mountains. "When," she asked, "does the glacier speed?"

Then there was the lady who thought that the Lodge would be very pretty when this was finished when the walls were plastered and wallpapered. That the great peeled logs, well chinked and cunningly fitted together, were meant to be as they were, never entered her consciousness. She knew nothing of the beauty of mountain architecture.

The prize, however, goes to the lady who was discussing the wild life of the park with one of the wardens. "The goats and the sheep are the same species, are they not?" she asked innocently. "Which are the males?"

"Oh, the goats, madam," said the warden, without batting an eyelash.

The Family Physician. The good doctor is always with his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

Soviets Plan Subway

Russel R. Rosoff, subway contractor, has confirmed reports that Soviet Government is planning construction of a subway and waterworks to cost about \$150,000,000 for the city of Moscow, and which may be built and financed by Americans.

No child should be allowed to suffer an hour from worms when proper remedy can be got in a single but strong remedy—Mother Graves' Worm Expeller.

Gravelite, Fla., annually ships more watermelons than any other place in the world.

Wool Returns Much higher

Last Year's Final Payment To B.C. Sheepmen Totalled \$33,000

Between 500 and 600 sheepmen throughout British Columbia received a fourth-year Christmas present a week before the festive season when the final payment was made on the 1928 wool clip by the British Columbia Wool Growers' Association. This final payment represented a total of \$33,000. The total amount paid out for the year's clip was \$109,287, payment being made at 51.8 cents per pound, as compared with 24.9 cents last year, an increase of 26 per cent. The 1928 wool shipments by the provincial association to the Canadian Co-operative Wool Growers' Ltd., at Weston, Ont., were \$43,749 lbs., as compared with 205,500 lbs. in 1927, when the total amount paid out was only \$51,170.

Sore Corns Drop Off

If You Use "Putnam's"

When you notice any sign of corns on the feet or toes—that's the time to put on a few drops of "Putnam's Corn Extractor." Do this, and you prevent corns. No matter if the corn is hard or soft, let it be on top or between the toes, "Putnam's" will move it without pain. It does the work—and keeps out the corn, quickly and without pain.

Scarcity Of Seed Oats

Alberta Farmers Are Advised To Arrange For Necessary Supply Early In Season

Farmers throughout the province of Alberta are being advised by the provincial department of agriculture to make the necessary provision for securing the supply of oats for seed which they will require for their 1929 crop.

The effects of frost in a number of districts are reflected in a reduction in the germinating quality of a great many of the oat threshed and in a number of cases, supplies of oats suitable for seed will have to be shipped in. Elevator companies have expressed their willingness to assist in the distribution of good seed, and farmers are advised to communicate with their local elevator agents as early as possible in order to obviate the possibility of a scarcity occurring during the seeding season.

Miller's Worm Powders attack worms in the stomach and intestines at once, and no worm can come in contact with them and live. They also correct the unhealthy conditions of the digestive organs that invite and encourage worms, setting up conditions that are most beneficial to the growth of the child. They have attacked their power in hundreds of cases and at all times are thoroughly trustworthy.

It is said sharks do not attack human beings. So far as we are concerned, there will be no fight.

Some men take good care of an automobile; others treat it like one of the family.

Reading Good Books

Means Getting Acquainted With People Best Worth Knowing

To read good books—and by good books I mean books that will give you pleasure in the reading, stimulate thought, and help you to understand the world and humanity better than you did before you read them—to read such books is to mix with people whose thoughts and actions have led mankind down the ages. The whole world of reality, the dream world of romance—both are yours for the taking, if you will only cultivate a taste for reading.

To read good books is to understand yourself better, realize your responsibilities as a member of human society more completely through a better understanding of your fellow men. None of us, I suspect, ever attains the end of wisdom, which is to know yourself completely. But the pursuit of that end is about the only pursuit that gives humanity a genuinely and permanently interesting run for its money.

Don't Submit To Asthma. If you suffer without hope of breaking the vicious cycle which you do not put off another day the purchase of Dr. J. D. Kellogg's Remedy. A trial will drive away all doubt as to its efficiency. The sure relief that comes will convince you more than anything that can be written. When help is so sure, why suffer? This matchless remedy is sold by dealers everywhere.

More Beets Needed

The total production of sugar beets in Alberta for 1928, was 37,000 tons, while the capacity for the Raymond factory was 100,000 tons.

The sugar company guaranteed to cover as fast as the production of beets warrants. At a meeting of growers at Barnwell, the main problem considered was the means of raising the acreage now signed up of some 5,000 acres.

Corn cannot exist when Holloway's Corn Remedy is applied to them, because it goes to the root and kills the growth.

Science can explain almost everything except why the stifle is always injured when the radio is being shown off to visitors.

WINDOLITE

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal distributor and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding one of the health-giving rays. Therefore, the invention of WINDOLITE has completely solved the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass. That it freely admits the Ultra-Violet rays, and that it has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of calves and is being used in domestic and household requirements.

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all buildings. It is economical, unbreakable, doesn't need to be painted and is easy to cut and fit. It is now being successfully used for sunrooms, greenhouses, conservatories, factories, hotels, beds, plant coverings and greenhouses. It keeps out cold, rain, snow, frost, and is an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness weighs about 120 to 125 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, L.S., Toronto.

Use WINDOLITE and let YOUR PLANTS and YOUR CHICKENS and YOUR CATTLE

To Check Flu-Grip

Fight the Germs with Vapors Before They Can Get a Start

Treat All Colds Promptly But Be Careful Not to Disturb the Digestion With Too Much Dosing

While Flu is so prevalent every-one should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold." The only safe plan is to attack a cold at the very start. A hot bath, a laxative, and a vigorous application of VapoRub on the throat and chest at bedtime, will usually break up a cold overnight.

External Treatment Best

For hours after Vicks is applied, its ingredients, unaltered, remain, such as camphor, menthol, eucalyptus, thyme and eucalyptus, and eucalyptus, by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the olfactory acts

through the skin like an old-fashioned "drawn out," drawing out tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach

This simple external treatment is so much "doing" it is so apt to do. This is doubly important when "flu" is around, for your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for their children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu

When influenza colds are prevalent, you can often prevent infection by sniffing a little Vicks every night, or before exposure to mowing, or before exposure to mowing.

found Connie busily engaged in spading the earth in search of worms, which she tossed to the reward of birds that hopped on the ground and filled the air about her.

Scolding the bold camp-robers that ventured dangerously near the shovel blade, she scattered the soil then laughed joyously as the birds with a great flutter of wings pounced on the fat worms.

Andy thrust himself luxuriously on the green sward. This beautiful spot was favoured by the hot birds, a veritable haven of rest. The gentle murmur of the bees among the flowers, the soft, subdued twittering of the birds, the rustle of the leaves, and the laughing of the water, all combined to make one sweet monotony of sound that lulled him into drowsiness.

Connie sat down near him, the birds all about her.

"Ow do you get them so tame, Connie?"

"They know that I love them," she replied simply.

"I can't get anything but the camp-robers to come near me," said Andy.

"I take time and patience, Andy. As soon as the birds are assured that you mean them no harm, they are eager to be your friends. You'll remember," said Andy to that without plants man could not live," she went on. "It is equally true that if all the birds should perish, man would soon follow. And still more wonderful if we had no insects man could not survive."

Andy came to a sitting posture. "Do you mean to say that we should die if we had no insects?" he asked incredulously.

"Surely, Andy, you haven't forgotten what Dad told you last Sunday about insects carrying the pollen from flower to flower," replied Connie.

"I have it now!" cried Andy, "for a few moments of reflection. If we had no insects to carry the pollen the plants couldn't live. And if the birds were all gone there'd be no many insects that they're raised up every blizzard the farmers raised, and we'd starve to death."

Connie nodded.

"Strife no 'andome if I ain't wonderd."

Connie explained very simply to Andy the benefits derived by mankind from the various insects. Her discourse proved so interesting to him that he paid little heed to the time until the sun, disappearing behind the trees, warned him that it was time to return to his duties. Respectfully he arose and turned to the trail. Connie walking by his side. A goldfinch, rich in his summer plumage of bright yellow, black and white, hung away like a dainty sprite on a slender stem on the top of a tall thistle, bulging little throat came a rippling, bubbling song like a miniature torrent of ecstasy.

"Dear, dear, dearie," he called sweetly.

"Oh, you darling!" cried Connie as she stopped her hands.

"I've been trying to find their nest for several days, Andy, but the little birds have hidden it too well."

sworthy foreign labourer, moving slowly up the trail, merrily grunted in reply to Andy's cheerful salutation.

"One of Gillie's beloved hehunks," chuckled Andy.

A moment later he stopped suddenly. Connie was up there alone. For a short interval he hesitated then resumed his downward journey. "She'd shoot 'is blinkin' dead off 'is eye" he decided.

Just then he heard Connie's voice raised in a quick cry of anger. Andy jumped as though subjected to a galvanic shock. He turned in mid-air and before he struck the ground his short legs were going through the motion of running. The picture of Connie struggling in the arms of the burly foreigner made him fairly fly.

"In coming, Connie!" he shouted as he took up the hill.

Donald and Gillie, sitting near the fire, enjoying a smoke came to their feet as they heard a faint shout from above. For an interval they listened intently, but hearing no further sound they resumed their seats. Andy glanced his pace as he came to the clearing and saw that the man was unarmed. She was standing near the labourer with her head bowed.

"What's wrong, Connie?" panted Andy.

"Andy look!" she choked, "it's the mother bird. I had just found her nest—here it is." She parted the bushes to disclose a compact, cosy, cup-like structure of fine grass and moss placed in a crotch of the tree.

In the centre lay four downy fledglings whose tiny mouths gaped wide to receive the expected bit of food from the mother's bill. "Oh, Andy, if she dies the little ones won't live," said Connie in a voice filled with pity.

"Dear, dear, dearie," he called sweetly.

"Oh, you darling!" cried Connie as she stopped her hands.

Visions Scientific

Trip Around Pole

Captain Bartlett Has Spent Thirty Years in Arctic

A visionary scientific coasting expedition around the North Pole was planned by Captain Robert A. Bartlett, home only a short time from eleven months in the Arctic. Captain Bartlett, who has spent 20 years in the frozen north returned to New York with his famous schooner Morrice from the Behning Sea, with the Stoll-McCracken expedition. The ship which Captain Bartlett visited for the four year trip would be almost as much shaped to withstand ice pressure, and non-magnetic.

WORLD HAPPENINGS Briefly Told

A Toronto newspaper opened a fund for the relief of the British unemployed, particularly the miners and their families.

Units of insulin to the number of 1,126,500, costing \$4,500, were issued by the Ontario Department of Health during last month.

Representatives of the salmon industry of British Columbia estimate that this year's pack will be worth more than \$14,000,000, as compared with \$12,000,000 in 1927.

Major Carl Spatz and his Question Mark crew probably will be awarded Distinguished Flying Crosses for their endurance cast of 130 hours and 40 minutes non-stop flying.

England's oldest resident, William Walker, celebrated his 107th birthday recently. He received a presentation from the lord mayor of Nottingham. He was a bricklayer until he retired 23 years ago.

Howard Douglas, pioneer western Canadian, chief motion picture censor of Alberta for 19 years, and a former superintendent of Banff National Park, died at his home in Edmonton, at the age of 78 years.

The completion of the laying of steel into Churchill, the terminus of the Hudson Bay railway, will be marked by a celebration on a grand scale. It is announced. Plans will be formulated when the end of the work is in sight.

When the agreement with the transportation companies in regard to continental European immigrants expires in 1930 it will not be renewed. In the meantime immigration officials say they will restrict this immigration as far as possible.

A commission appointed to study the possibility of building a tunnel under the Straits of Chehalis has reported to the board with a favorable report. The cost of the tunnel was estimated at 300,000,000 pesetas (approximately \$16,000,000). The tunnel itself would be 20 miles long.

To Check Outlawry

Detroit Policemen to Receive Bounties For Killing Criminals Caught In Act

Hereafter Detroit policemen who shoot and kill a criminal caught in the commission of a crime will be paid a bounty of \$10, according to Police Commissioner Rutledge, who explained that the move was designed to check further outlawry.

The first presentation was made by Police Attorney Underman, as Gerald McCauley, who on Jan. 30 was forced to kill a negro when he resisted arrest.

John L. Pilgrim, a London woolen merchant, completed his 150th birthday of the Atlantic when he arrived at Liverpool in the White Star liner "Dattic."

"We stand back of every auto we sell," says an ad. Fine! The front is the dangerous end.

Manatt's Treatment

Intestinal flu, high blood pressure, nervous disorders, how careful one must be to avoid these dangerous ailments at this time of the year.

Keep the system clear of poisons and impurities. Tone up the liver, prevent bile stagnation and intestinal lethargy. Let Manatt's help you as it helps thousands every year to ward off illness and disease.

Canadians Are Meat Eaters

Per Capita Consumption Exceeded By Only Three Other Countries

In cattle holdings Canada ranks twelfth among the countries of the world. There are eight countries with more swine than Canada and apparently twenty with more sheep and lambs. The Dominion is exceeded in meat consumption only by Argentina, New Zealand and Australia, the per capita consumption of these countries being, respectively 246.5 lbs., 311.6 lbs., and 227.2 lbs., against Canada's 156.3 lbs. Following come the United Kingdom, 172.2 lbs., France, 115.0 lbs., Germany, 104.2 lbs., Denmark, 100.9 lbs., and Belgium 71.1 lbs. Canada's per capita meat consumption is made up of 68.8 lbs. of beef, having increased in this from 60.9 lbs. in 1910; 81.4 lbs. of pork against 66.7 lbs. in 1910; 8.1 lbs. of mutton and lamb, as compared with 8.7 lbs. in 1910; the total of 156.3 lbs. comparing with 126.3 lbs. in the former year.

A PROBLEM FOR YOUNG MOTHERS

Stomach troubles cause most of the distress of babyhood and childhood, and are the greatest problem that a young mother has to solve. The treatment for these digestive disorders, that distressing sheep must be quick and effective, and should be so simple that even the youngest mother can administer it.

The absolute safe treatment for disturbances of the stomach and bowels is found in Baby's Own Tablets. Thousands of mothers have had their babies brought back to normal. They are guaranteed to be free from all injurious drugs and cannot possibly do harm to even the youngest babe—they always do good.

Baby's Own Tablets regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fevers and promote health-giving sleep which is so necessary to the welfare of the baby or growing child. The Tablets are bought by all medic dealers or by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Winnipeg Newspaper Union

Patrol Of Royal Mounted
Order Maintained Throughout Great Regions Of North-West Territories

The city or suburban policeman who is inclined to grumble about the size of the territory he has to patrol, should be given a glimpse of the area which has to be covered by the Royal Canadian Mounted Police. To them is given the task of maintaining law and order and enforcing the law in the great regions of the North-West Territories, stretching in belt 2,200 miles wide from the Atlantic in the east to the Mackenzie River delta in the west. Posts are stationed along the coast from which patrols and investigations are undertaken each year by the officers stationed there. Two years is the normal span of duty for a constable in these territories, but not infrequently the constable of the Arctic is so irremovable that the members of the force return for duty again and again.

Newspaper Suffers Loss By Fire
Plant Of The Turflore Recorder Is Prey To Flames

Fire of unknown origin destroyed the post office and newspaper plant at Turflore, Sask., recently. The building and printing plant were owned by C. R. McIntosh, and were covered by insurance. Post office fixtures, owned by A. Vinje, postmaster and editor of the "Turflore Recorder," were also insured. Owing to strenuous efforts on the part of volunteer fire fighters the blaze was kept from spreading. No fire has been made in the building on the day of the outbreak, according to Mr. Vinje.

Regularity Is Essential
Live stock thrives best when fed and watered regularly. There is a strong temptation to lie in on the cold mornings or to do the chores earlier than usual when the days are short and dull. Irregularities in the handling of live stock do not favor fastness or production. For best results "chores" should be done by the clock.

How To Order Patterns
Address: Winnipeg Newspaper Union,
175 McDermott Ave., Winnipeg

Pattern No. Size

Name

Stage Director (getting cast ready): "Are you Appius Claudius?"

Superintendence: "No, quite the opposite in fact, in this heavy armor."

The Right Way to Treat It

Anxious To Protect Canadian Fishermen

Regulations Aim To Prevent U.S. Fishermen Selling In Canadian Ports

Possible International conference regarding the fishing treaty between Canada and the United States may come as a direct result of the allegation made by Oregon and Washington fishermen of treaty violations on the part of the Dominion on the Pacific Coast which have been forwarded from Seattle to Washington, D.C., and to Canadian Government officials.

The department of Marine and Fisheries has issued the following statement: "There is no desire on the part of Canadian authorities to restrict in any way the privileges which U.S. salmon trolling boats are entitled in Canadian ports, but when these boats are carrying on their fishing just outside Canadian water or along the Canadian coast they are not being allowed to use such ports for purposes of refueling, repairing, and so make them in a large measure for practical purposes bases from which to operate. Seizures were made only when such action appeared necessary to impress the boat and to secure them were not made until after the boats concerned had received notification that Canadian ports might be used only for basic shelter or other treaty purposes."

At the present time U.S. ports charge a two cent duty on every pound of Canadian fish sold through the port. The object of the Canadian regulations is to prevent United States fishermen selling their fish in Canadian ports and thus gaining the advantage of the Canadian fishermen.

**Heart Palpitated
Nerves Bothered Her
Sleep Was Broken**

Mrs. Fred A. Pugsley, East Southampton, N.S., writes:—"I was both annoyed by my nerves and palpitation of the heart, and my sleep was broken at night."

I decided to try

and after I had taken six boxes I found that they had done me so much good I will gladly recommend them to all those who are troubled with sleeplessness, caused by their heart and nerves."

Price per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Expert Advice
Some one notes that a generous supply of advice on care of children always is available and most of it is prepared by women whose names appear in print preceded by four letters, Miss.

Visitor—Why does your new clerk jump every time he hears the telephone bell?

Manager—Force of habit. Used to be a freeman.

ITCH ECZEMA ON BABY'S FACE
Broke Out In Watery Pimples, Cuticura Healed.

"Eczema broke out in watery pimples on my baby's face. It was itchy and sore and my baby was scratched, and her face was covered with scabs. I tried to wash it with soap and water, but it only made it worse. I used Cuticura Soap and Ointment and after a few days the pimples were gone and my baby's face was clear and healthy. I purchased two boxes of Cuticura Soap and two boxes of Cuticura Ointment. The Ointment was completely healed. (Signed) Mrs. Clifford Francis, Westchester, N. Y."

Give Cuticura Soap and Ointment the test of your own skin.

Proves Laborious Task
Editor Of Oxford Dictionary Searching For Definitions Of New Words

So many new words have been coined in the past four decades, that thirty pages of the New Oxford Dictionary are necessary to record only those beginning with the letter "A." This was revealed by Dr. O. T. Onions, who is editing the new supplement to the dictionary. It was not only such obvious additions as automobile and airplane that are giving the dictionary staff a laborious task. The new words, according to Dr. Onions, include a "multitude of common colloquialisms, technicalities that have become public currency, and labels, discoveries, inventions, names of exotic plants, garments, terms of sport and of the new psychology."

There are, for instance, auto-suggestion, auto-piano, auto-erotism, autogiro, accent in art to put or get it across, apperception, the altered line, apache, adeoids, aspidistra, aerobatic, alpha rays, drug addict, arseph, arseworthy, Anglo-phobia and accelerometer."

In the original Oxford Dictionary, published in 1888, "adenoid" was included not only as an adjective signifying glandular, but also as a noun in a plant long known in old-fashioned English homes, but it never before achieved a place in a dictionary.

On the other hand some words used in 1888 have since become obsolete. The older meaning of "airplane" was a plane or wing, while "anemometer," meaning moving picture, is now dead as a doornail.

Dr. Onions is still searching for adequate definitions, quotations and exact references for many words. Musical terms puzzle him as constantly.

He thinks he ought to include the word "agin" as in "agin the government," and also the shopping term "on approval." There is a further possibility that the new dictionary may sanction "alright" as one word because of its universal usage.

"Truly," comments the Manchester Guardian editorially, "our dictionary makers are toilers at an enervating task."

ARRANGING FOR 6,000 BRITISHERS FOR FARM WORK

Ottawa.—Arrangements have been completed by the Department of Immigration to place in farm employment in Canada 6,000 British trained immigrants which is the maximum number that will be available before the end of July. The department will assist in placing as many as possible of any others who want farm work and come to Canada on the new \$50 rate.

This was announced by W. J. Egan, deputy minister of Immigration, in making public a letter to the railway companies.

The deputy minister explained to the railway companies that it had been the experience of the department in the past three years that not more than 30 per cent. of the alleged farm laborers brought from non-preferred countries actually stayed on the land.

Unquestionably there was a very strong feeling against the unduly large proportion of foreign as compared with British immigrants shown in the immigration statistics for the last few years, the letter set forth, and the movement under the railways agreement was largely responsible for this condition.

These restrictions, however, do not apply in any way to the movement of central European agricultural families coming to Canada for land settlement nor to the movement of house workers who are coming under proper arrangements for their protection.

The province of Alberta has made representations to the department that while they are anxious to secure a supply of British farm labor and a supply of non-preferred countries, they already have in the province all the non-preferred country immigrants they require for farm work this year. In view of this situation the department will endeavor to carry out Alberta's wishes and the province is being so advised.

Death Of Senator Ross

Conservative Party Leader in Senate Dies Away.

Guelph, Ont.—Senator William Benjamin Ross, Conservative party leader in the Senate for the past five years, died in Guelph, Ontario, this morning, having been a patient for two months. He was 74 years old.

Senator Ross succeeded to the leadership of the Conservative party in the Upper House in June, 1926. He had been a member of the Senate since 1912.

In 1931 Senator Ross went to Regina and practiced law there. He was a clerk in the Guelph, Ontario, the rebel, an associate of Louis Riel.

Later he came back to Halifax and went into partnership with Robert Bevilacqua, afterwards a deputy minister of justice and later a judge of the supreme court of Canada. Later he became connected with several other law firms.

Ship Hurdles To Byrd

Dogs Required For Pole Expeditions Have Left Vancouver

Vancouver.—When the R. M. S. Niagara sailed from Vancouver, Jan. 9, for New Zealand and Australia ports she carried 19 young husky dogs for Commander Byrd's Antarctic expedition. The dogs have been housed at the Cruise Maritime Kennels here.

The dogs must reach Dunedin, N.Z., by February 7, in time to be forwarded by the steamer Elmer Bolling for the Antarctic base on the edge of the great ice barrier. E. J. Parr, agent for the White Pass and Yukon Route, has completed all arrangements for the shipment in response to a recent request by Commander Byrd. It is stated.

Succeeds To Earlton

Alberta Farmer Is Now The 10th Earl Of Egmont

London.—Charles John Percival, 5th Earl of Egmont, died recently. Frederick Joseph Trevelyan Percival, a distant relative, who resides near Princes, Alberta, succeeded to the title.

The ninth Earl of Egmont was a widower without children or near relatives. He was the great-grandfather of the second Earl of Egmont. The earldom was created in 1733.

W. N. U. 1768

Harvest Help Influx

Hon. Peter Heenan Explains Why Harvesters Were Brought From Britain

Ottawa, Ont.—A total of 75,000 harvesters were needed in western Canada harvest fields last year and as no assurance was forthcoming from the eastern provinces that they would supply 44,000 to add to the west's available 31,000, the federal government was obliged to appeal to Great Britain for men and as a result the miner-harvester scheme was brought about. This was the explanation of the influx of British harvesters last year to help gather western Canada's wheat crop, given by Hon. Peter Heenan to the labor delegation which presented its legislation program to the federal cabinet.

The federal government had to protect itself, Mr. Heenan explained and as the eastern provinces could not assure the government of 44,000 harvesters, it was decided to bring in the harvest fields.

The estimated requirement of 75,000 was made by a committee which investigated the harvesting conditions.

German Report Shows

Gold Reserves

Reichsbank Vaults Contain Twice As Much As Before War

Berlin.—Five years after the stabilization of the mark, the vaults of the Reichsbank contain more than twice as much gold as before the war.

At the beginning of December the Reichsbank reserves showed a total of 2,650,000 marks worth of gold, while on December 31, 1923, the Reichsbank had only the equivalent of 1,170,000 marks in gold. Since 1924 the gold of the Reichsbank has shown a constant increase, 1928 being a record year with acquisitions of gold amounting to 787,000 marks until the end of the first week of December.

During the years 1924, 1925, 1926 and 1927, the Reichsbank has bought up gold amounting to 283,000, 448,000, 377,000 and 314,000 marks respectively.

Japanese Seize Revolt

Assistance Of Infantry Required By Police To Control Peasants

Tokio.—Three companies of regular infantry were rushed to Nara, a village near Kyoto, when Japanese smoldering rural unrest flared up momentarily.

Two thousand peasants marched on Nara, the local government offices and 300 police were unable to control them. Fighting ensued with casualties on both sides and the towns were looted.

The peasants were protesting against a government riparian project which they claim would flood hundreds of acres of paddy (rice) fields.

It was officially reported that the police had been gathering in the neighborhood districts and arming with bamboo spears.

To Broadcast British Campaign Speeches

Broadcasting Debate Between Party Leaders Is Also Proposed

London, Eng.—Radio will play a big part in the political speech making of the coming general election campaign. According to Hon. Neville Chamberlain, at Liverpool, on January 18, and Premier Stanley Baldwin, at Newcastle, on January 24, the Conservatives are to broadcast the country. A proposal to broadcast a debate between the leaders of the three parties on the debating bill has been accepted by the Labor party, and it is expected the Conservatives and Liberals will fall in line.

Joins Government's Staff

Ottawa.—Arrival of Captain R. J. Streatfield from London, Eng., to join the personal staff of His Excellency the Governor-General has been announced from Government House. Captain Streatfield is a nephew of Col. H. Streatfield, who was killed in 1914 to Lord Lansdowne, when the latter was appointed governor-general of Canada.

Expect Increased Migration

Liverpool, Eng.—Authorities, both British and Canadian, expect heavy immigration to British Columbia farm settlers to Canada in the spring. Negotiations are under way between the two governments it is not directed against any other than the movement of 6,000 trained and partially trained men for farm work in April.

Test Saskatchewan Seed

Seed Testing Laboratory Is Established At Saskatoon

Saskatoon.—Saskatchewan needs will in future be tested in the laboratory of the Dominion Seed Branch of the federal department of agriculture which is being put into operation in rooms occupied by this department here, according to the statement given out recently.

Preparations for opening this laboratory and offices have been under way since December. It will occupy 3,000 feet of floor space will be occupied.

Nelson Young, of Winnipeg, acting district inspector for the whole district of Saskatchewan will be in charge. Dr. F. T. Wahlen, chief seed analyst of Ottawa, head of the laboratory work in Canada, is here in connection with the opening of the laboratory.

Science Aids Farming

Soon To Be Able To Develop Wheat That Will Resist Frost And Rust

Ottawa.—Within the next few years Canadian experts will have developed scientific means to resist both frost and rust in the grain of the new Peace River fields. Hon. W. R. Motherwell, member of agriculture, said when addressing the first day's session of the eastern Canada Fruit and Vegetable Jobbers' Association here.

"Canada is a great next year country," said the minister. He meant, he explained, that no matter what conditions of one time were Canadian people had a habit of picking their feet upon the future and working wholeheartedly for the prosperity of tomorrow.

NEW PICTORIAL STAMP ISSUES NOW ON SALE

Ottawa.—Canada's new pictorial stamp issue is completed and the four larger denominations are now on sale. The stamps are to be regarded by philatelists as the finest produced in any country.

Each section of Canada is represented. The one-dollar stamp carries a picture of the parliament buildings and is significant of the central part of the country. For the northwest the 50-cent denomination shows the Quebec, Bluenose, winding the rocks on the border of the race. The Quebec bridge appears on the 12-cent stamp. The prairies are typified in the 20-cent stamp by a picture of a wheat field. The 10-cent stamp bears a representation of a mountain in British Columbia with the peaks on the border of the race.

The lower denominations carry the king's head. All numerals are larger than in previous issues. The stamps are stated to be among the finest examples of the engraver's art. Under the microscope the windows in the parliament buildings may be counted and figures of men in the British Columbia stamp, smaller than a pin head, are replete with detail.

PREDICTS POLITICAL CRISIS

Arthur Beverley Baxter, the Canadian who is managing editor of the Daily Express, London, who has cheerfully put it, by announcing that Beverbrook is prepared to go to the mat with the die-hard political parties in order to effect an empire-wide tariff.

Baxter, who made the announcement during his present visit in Canada, predicts that Beverbrook's action will result in one of the greatest political crises in British history.

Boost Automobile Insurance

Report States Rates Throughout Country Are To Be Increased

Toronto.—Automobile insurance rates throughout Canada are to be increased sharply—as much as 50 to 60 per cent. for legal liability and as much as 25 per cent. for collision. It was announced here recently, following a meeting of the Canadian Automobile Insurance Underwriters' Association. The increase will be graded to differentiate between urban and rural areas.

It was stated that the ground-up which the increased rates would be put into effect were that business was in such a condition as to be profitable and that Canadian rates are lower than those prevailing in the United States.

It was announced that after a survey of present rates at the meeting, it was decided that "adjustments were imperative."

McLean To Receive

Eight Thousand Yearly

New Post Carries Salary Of A Deputy Minister

Ottawa, Ont.—Hon. J. D. McLean, former premier of British Columbia, and newly appointed farm loan commissioner, is in conference with departmental officials here and beginning the preliminary work of organization. Mr. McLean will be paid \$8,000 per year, the salary of a deputy minister. Two other members of a farm loan board who will serve part time, will shortly be appointed.

Earthquake In Turkey

Constantinople.—A violent earthquake accompanied by a terrifying subterranean roar occurred at Ankara recently. No accident to life or property was reported.

Dog Days of Quebec

Quebec, P.Q.—A violent earthquake accompanied by a terrifying subterranean roar occurred at Quebec recently. No accident to life or property was reported.

May Restrict Migrants From Certain Areas

Ottawa.—It is reported here that Hon. Robert Forke, minister of immigration, is planning to restrict immigration from Central and Southeastern Europe. The information is supposed to have been conveyed in telegrams from the minister, who is in the west, to Ottawa.

W. J. Egan, deputy minister, stated that he had received no such telegraphic communication from Mr. Forke.

The report suggested that the government would decline to renew its conventional agreement of the railways, which expires in October, 1930. This agreement enables the Canadian National and Canadian Pacific Railways to bring agricultural and domestic workers from the United States to Canada if they are suitable from a physical and mental standpoint. This agreement is subject to cancellation at any time on one year's notice, or can be suspended by order of the minister of labor if labor conditions here warrant it.

Visualizes Conditions Ideal

Henry Ford Says Farming Needs To Be Completely Revolutionized

New York.—A world in which no one smokes or discusses prohibition, in which men no longer farm and housewives no longer cook, and machines take care of the drudgery is outlined by Henry Ford in his new book, "The Philosophy of Industry," just published.

"The great problem in the home today," the Detroit capitalist points out, "is too much drudgery. We shall soon find a way to do much of the cooking outside and deliver it in a hot and appetizing condition at meal times at no greater cost."

The old farm is likewise due for a big change, according to Mr. Ford. "Farming needs to be completely revolutionized," he says. "Large corporations, whose sole business it will be to perform the operations of plowing, planting, cultivating and harvesting, will supersede the individual farmer or groups of farmers will combine to perform their work in a wholesale manner. This is the proper way to do it and the only one in which economic freedom can be won."

The Canadian National Railways will ask for a charter to build a branch line connecting Saskatoon and Melville. They already have a line started there running north from Vonda. In 1924 the National Railways asked for the right to build such a line, but their bill was killed in the senate. This territory is one in which the most acute conditions occur between the railway companies.

Winnipeg.—An era of expansion involving construction of approximately 1,200 miles of track into virgin country in Western Canada at a cost of not less than fifty million dollars is being contemplated by the application of the Canadian Pacific Railway for new lines. This will mean employment of many thousands of men extending over a period of five years, it is understood.

New Directors Elected

Aberdeen-Angus Association Announces Appointments For This Year

Brandon.—The election of directors for 1929 of the Canadian Aberdeen-Angus Association, has been announced by the secretary, F. W. Crawford, as follows:

For Ontario and other eastern provinces: John Lowe, Elora, Ont.; James Bowman, Guelph, Ont.; Col. R. McEwen, London, Ont.

Manitoba—Harry Leander, Burnside, P. H. McGregor, Brandon.

Saskatchewan—U. D. Lyon, Devron; W. J. F. Warren, Lebelle.

Alberta—P. H. Reed, Lacombe; S. W. Henderson, Lacombe; Charles Elliott, South Edmonton.

New Airplanes Ordered

Five Are Especially Equipped For Patrols In Alberta

Ottawa.—Fourteen new Mohawk planes were ordered by the Department of National Defence for the military aviation flying club in Eastern Canada and for forest patrol work out of High River, Alta., air station. The order involves more than \$80,000.

The order calls for five machines especially equipped with radio sets, added fuel carrying capacity and special navigation instruments for the difficult patrols in Alberta where it is necessary for pilots to make long flights at high altitude.

Report Is Denied

Ottawa.—The Canada-United States anti-smuggling conference recently issued a denial of statements appearing in a morning paper that the Dominion will not accede to the request of the American delegation for refunding of clearance to liquor for the U.S.

Customs Inspector Resigns

Montreal.—Resignation of A. L. P. Edwards, a British subject, as inspector general of Chinese customs has been accepted. Deputy Inspector W. M. Wade was appointed to succeed Mr. Edwards who resigned as a protest against dual control of customs.

MAY HAVE TO ARBITRATE ON BRANCH LINES

Ottawa.—The official announcement of the C.N.R. branch line program which is to be submitted to Parliament is taken here as meaning that attempts to remove conflict between the two railway companies have failed of success and that parliament will be compelled to arbitrate between them.

In the official list of branch lines, for which the C.N.R. will seek charters from Parliament are several which will be contested by the Canadian National Railways on the ground that they invade Canadian National territory. The full extent of the conflict will not be revealed until the Canadian National branch line program is announced. This program, it is stated, has not yet been formulated but undoubtedly will be very large and will call for lines in much of the territory being sought by the C.N.R.

The Canadian National Railways will ask for a charter to build a branch line connecting Saskatoon and Melville. They already have a line started there running north from Vonda. In 1924 the National Railways asked for the right to build such a line, but their bill was killed in the senate. This territory is one in which the most acute conditions occur between the railway companies.

This will mean employment of many thousands of men extending over a period of five years, it is understood.

National Resources Question

No Statement By Premier King In Respect To Province Of Alberta

Ottawa.—Premier Mackenzie King has not yet issued any statement with respect to the return of natural resources to the province of Alberta, and it seems doubtful whether he will do so. The matter is being discussed in the House of Commons.

When Premier Brownlee was last in Ottawa, it was understood that a tentative arrangement had been arrived at, but that it would be discussed further in correspondence between the two governments.

A dispatch from Edmonton outlining what is said to be a new offer by the Dominion indicates that this correspondence is proceeding calmly. The prime minister, however, has made no announcement as yet.

Reach Flin Flon By Auto

This Means Of Transportation A Success During Winter

The Flin Flon, Man.—The first time in the history of Western Manitoba, automobiles are being used this winter as a means of transportation over the ice to the Flin Flon. The Flin Flon and Flin Flon, a distance of 400 miles.

Jim Reid, a well-known mining man, started out for Flin Flon via Sturgeon Landing and word was received here that he had reached the landing. Two other parties started out on the same trip a little later.

Automobiles are running daily between Cranberry Portage and Cold Lake as well as aeroplanes, tractors, and snowmobiles.

EDITORIAL

It wasn't so very long ago that we saw a man slip on an icy place on the sidewalk and then say something under his breath. Now we don't pretend to know just what that man's thoughts were nor what he was saying to himself but we have an idea that it wasn't very complimentary to the owner of the walk, nor to the climate either for that matter.

Efficiency
 The final achievement in thrift will come when our morning papers are printed on breakfast food.

The work on the hall is progressing very nicely. By the time this gets to press the main hall will have its first coat of plaster on. Con-

tractor Visser is authority for the statement that it will be ready for the opening by Feb. 15th or thereabouts.

To the average mother a door is something the baby messes up with his fingers. All the other children forget to close, and father langes to indicate he has lost an argument.

The prize economical fellow in the Dominion got married in the back yard so his hens would get the rice.

By no means nists the big Mc-Drig. tractor school next Tuesday, Wednesday and Thursday in Lethbridge. You are all invited to be the guests of the national Harvester Co. for those three days. All the latest machinery on display as well as instructive talks on tractors, combines and threshers.

LOCALS

Lost—Between Ford Garage and D. Watkins' resident, a motor car rug. Finder please notify The Chronicle.

As a result of having sold some 3200 bushels of wheat outside the Pool last year, a Pool member in the northern part of the province has recently paid the Pool \$800 in settlement for his breach of contract.

Mr. and Mrs. Ed. Beingsen wish to thank the friends who were generous with gifts and flowers during the latter's illness in the Holy Cross hospital, Calgary, including the Catholic Women's League and Golden Rule Institute.

A masquerade dance under the auspices of the Agricultural Society is advertised for Jan. 25th. Music will be supplied by a popular orchestra and lunch will be served in the hall. Admission \$1.00. Let's all go for a good time. Prizes are offered for the best lady's and gent's fancy costume, best comic and best original costumes.

K. R. McLean R.O. of Anderson & McLean, Sight Specialists, 208 8th Ave. West, Calgary, will make his monthly visit to Champion Friday, Jan. 18th At the Drug Store.

A Valentine tea under the auspices of the Girls' Perseverance group of the C. G. I. T. will be held in the church at 3 o'clock in the afternoon on Feb. 9th, Candy and Valentines will be sold. Admission 25c.

Plastering is in progress on the community hall and will be completed at an early date according to the contractor.

The building has taken on considerable of its permanent appearance recently and general appreciation of the design is freely expressed.

In Memorium

In loving memory of our dear mother, Elizabeth Brown the beloved wife of James Brown who passed away on January 16th 1928.

Your earthly task well done
 God called you home.
 Your memory lingers in our hearts
 We miss you so.
 We'll meet again on yonder golden shore.
 And dwell with Christ in peace forever more.

James Brown and family.

A survey of current publications places the Family Herald and Weekly Star of Montreal in the lead for variety and quality of reading. Always recognized as a steady guide and counsellor to the farmer the survey proclaims it almost as equally popular in urban home.

New School is Occupied

For a week now the teachers and pupils of the Champion Public School have been occupants of the new building and they unite in voting it a very fine building.

During its erection and since its completion the new school has been visited and exclaimed over enthusiastically by the residents of the district, all of whom agree that this fine building deserves a fitting ceremony to commemorate its opening.

The children and teachers feel that our new school is a splendid building and that it is an honor to attend school in it.

Therefore after much discussion it was decided that both parents and children should have a share in the formal opening of the building. One afternoon is to be set apart in which the children shall have their share in this ceremony. In the evening a banquet will be served for the adult members of the community, followed by a suitable programme.

We realize the necessity and great importance of education and for that reason we wish to put forth a special effort to make the opening of the new school an event to be looked back to by not only the children, but also by the adult members of the community. The date of this opening has not been definitely decided as a speaker for the evening has not yet been secured. It will be announced in the near future.

Champion Versus Vulcan

The Champion and Vulcan hockey teams met on the Champion ice, Friday, Jan. 11th for the first time this winter. This game provided the crowd with the thrills that are customary when these two rival teams meet. The first period was somewhat slow on account of the soft ice, but at the end of this period the score was 1-1.

Then came the fatal second. The Vulcan aggregation went on a scoring spree, and planted the puck three times behind our goal. The third period looked dark for the locals, but when it finished the score was 4-3 in favor of Vulcan.

In the final period Champion scored two making the final score 5-4 in favor of the locals.

Proper Hitches

Well Explained

All farmers using horses to supply farm power will find some valuable advice on hitches and equalizers for teams of four to twelve horses in a pamphlet recently issued by the Great West Saddletry Co., Edmonton office. Details of the most effective hitches for all sizes of teams are shown by diagrams and photographs.

The booklet has been compiled with the assistance of some of the outstanding University Extension Department on the Continent and includes comparisons of horse power and utility with power machinery. As measurements are given for the lengths of equalizers so that the proper device will be made among all horses when large teams are used,
